

Single lift cylinder for easy maintenance

**Closed fork tips** 

Quick lift pump as standard

AMX-E: with electric lift

Energy-saving operation: no battery lift during lifting process

### **AMX/AMX-E**

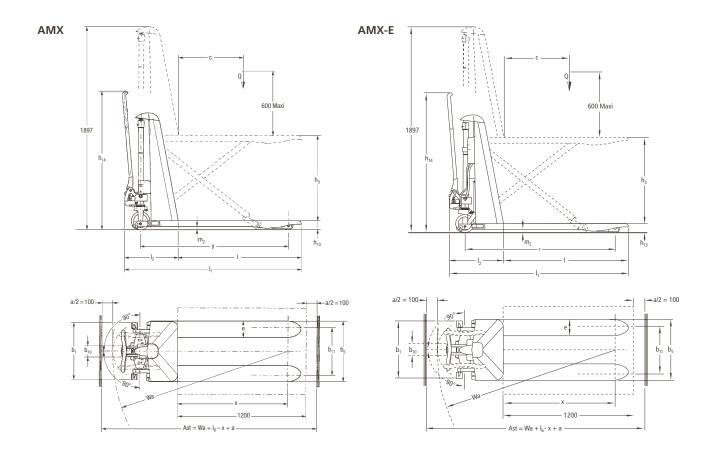

### Scissor Lift Truck (1000 kg)

The truck can be used as hand pallet truck, as well as, a lift table, marshalling table and/or a workbench.

- Steering wheels: Ø 170 mm with a choice of Nylon, rubber or Polyurethane tyres.
- Load wheels: Ø 82 mm with Nylon tyres.
- Lift height: up to 800 mm with additional support legs for stability.
- Lifting and lowering: manual or electrohydraulic lift with 0.5 kW lift motor.
- Forks: robust, high-strength construction with closed fork tips.
- Battery (only for AMX-E): 70 Ah maintenance-free.
- AMX with manual hydraulics: the load is raised to the optimum working height
- with a few tiller movements. The scissor lift fork lift truck is stabilised by additional support legs whilst lifting.
- AMX-E with electro-hydraulics: for frequent changes of working heights, the scissor lift truck with electric motor is recommended. The working height can be attained quickly using a push button.

## **AMX/AMX-E**

<sup>4)</sup> integrated charger

## Make use of the advantages

#### Easy handling

The smooth-running operating handle is ideally suitable for both left and righthanded operators. The special lowering valve facilitates loads being lowered particularly sensitively and proportioned.

#### **Effortless lifting and lowering**

There is a choice of either manual hydraulic lift (AMX) or electro-hydraulic lift (AMX-E) with a 0.5 kW lift motor. The pump aggregate has an integrated tank. The lowering valve integrated in the pump aggregate facilitates sensitive lowering via hand lever. The hydraulic system is protected against overloading with a pressure relief valve.

#### Gentle on the back lift height

Jobs involving bending and heavy lifting soon affect health. The working height of the AMX/AMX-E can be varied up to a height of 800 mm. This ensures back protecting operation. The scissor lift fork lift truck can also be equipped with lateral support rollers, so that moving with the forks raised is possible.

#### Battery and charger (AMX-E)

An inbuilt charger is fitted as standard. The maintenance-free battery (70 Ah) can be charged at any 13 Amp plug socket. The charger is automatically switched off when the charging process is completed.
