

**Drive, lift and steering motors
in 3-phase AC technology**

**Improved manoeuvrability
through compact chassis design**

Electric 180° steering

**Smooth hydraulic operation
through SOLO-PILOT control lever**

**High operating safety
with Curve Control**

ETV 110/112/114/116

Electric Reach Truck (1000, 1200, 1400, 1600 kg)

Space-saving construction, excellent performance and comfortable working area – these are the strengths of the Jungheinrich Reach Trucks ETV 110 to 116. The advantages:

- Space-saving through narrow working aisle widths from 2659 mm (according to VDI – when picking up a pallet lengthways). With its slim support arms, the ETV 110/112 can pull a lengthways Euro pallet back between the support arms – despite its compact chassis of only 1120 mm. This creates more room during operation with oncoming traffic in block stacking aisles or in drive-in racking.

- Higher throughput – as well as increased availability – due to 3-phase AC technology on drive, lift and steering motors.
- Motivated and stress-free operators due to efficiency-enhancing ergonomics. The operator is immediately aware of the added comfort: Using the lowered entrance, he comfortably gets into the operator compartment equipped with 3-fold adjustable seat, adjustable armrest as well as a steering wheel adjustable in both horizontal and vertical directions.
- Automatic speed reduction on corners. Curve Control limits maximum travel speed

and acceleration on corners. The danger of a building up process or even tipping over is drastically reduced.

Thus the Jungheinrich series 1 Reach Trucks provide the best solution for cost effective stacking and retrieval at high lift heights and in confined spaces. Be it during the handling of pallets (operating in drive-in racking), in narrow or low areas, or single shift or multi-shift applications – the series 1 Reach Trucks are suited to every application.

Make use of the advantages

High performance mast

Jungheinrich masts guarantee maximum safety and storage utilisation to high lift heights. Their strengths:

- Excellent visibility towards the load.
- Integrated sideshift.
- Lowest closed mast height with high lift heights.
- Extremely long service life due to high quality mast profiles.
- High residual capacities up to high lift heights.
- Lift heights up to 8420 mm with mast tilt.

Ergonomic cab

Ergonomic cab

The operator cab provides ideal working conditions for excellent performance and support for the operator. Its strength:

- Comfortable seat with adjustment options (sitting position/backrest/body weight) for every operator.
- Various storage facilities.
- The important operating functions are easily accessible without reaching round.
- Generous space.
- 3-phase AC steering (180° or as an option 360°) with stress-free steering wheel position.
- Horizontal/vertical steering wheel adjustment.

SOLO-PILOT

Effortless operation with SOLO-PILOT

Incorporating the control levers for all hydraulic functions as well as travel direction selection and horn.

- All operating functions are in view.
- Additional attachments, such as fork spreaders (optional), are also easily controlled with the SOLO-PILOT.
- Precise operation through sensitive control of all functions.
- Comfortable working position with adjustable armrest.

Easily read operator display

High quality display of important operating information.

- Travel direction and wheel position indicator.
- 180°/360° steering mode.
- Battery discharge display with residual running time.
- Three adjustable travel programs to suit every requirement.
- Operating hours and time.
- Lift height (optional).

More efficient with 3-phase AC technology

Powerful 3-phase AC technology for drive, lift and steering motors provides a number of advantages compared with traditional direct current motors.

- Powerful acceleration.
- Fast reversing without hesitation.
- High availability through maintenance-free motors without carbon brushes.
- Longer operating times due to energy reclamation on reducing the travel speed.
- 2-year warranty on drive and lift motors.

A chassis width for every application

The correct chassis width for the appropriate application. ETV 110/112 with 1120 mm chassis width for drive-in racking or block stacking aisles. Picking up a Euro pallet lengthways between the support arms is possible. ETV 114/116 with 1270 mm outer chassis width for high capacities to high lift heights.

The correct chassis for every application
